SERVICE IS ADEQUATE EXCEPT WHEN IT RAINS OR SNOWS OR  
TOO MANY PEOPLE ARE ON-LINE.

THE SERVICE IS QUITE EXPENSIVE.

RUMOR HAS IT THAT A NEW SATELLITE NEXT YEAR WILL  
TRIPLE THE SPEEDS.

LAST WEEK FAIRPOINT STRUNG FIBER-OPTIC CABLE ON OUR  
ROAD. WE DON'T KNOW WHAT THAT SERVICE WILL COST OR  
HOW THE SPEEDS WILL COMPARE WITH SATELLITE.

We asked to be hooked up to satellite service  
the only ~~th~~ there is is satellite when its on  
but they dont come out this far.

No cable comes out this far (However you can look  
down the Hill and see where it ends)  
so cable hook up is out

We should not be discriminated against  
just for being out in the country!

To be able to enjoy internet access the same  
day you punch or turn it on would be something  
different maybe we could get something  
besides email on theputer (That would be  
different) we can only turn it on once a week  
as it wast to much time and electricity to  
try more often, it does save on stamps but  
makes you wonder if its worth it.

#3 I live in an area not served by telephone or electric. I am off the grid and make my own electricity.

Satellite is my only option. It is not adequate because of what the provider terms "Fair Access Policy". That basically means, I am limited in how much I can use the service at higher than dial-up speeds. I'm sure you are aware of this issue. I can understand the need to limit people from downloading huge movies and the like. I don't do that, but I am still unfairly limited.

#5 The speeds are quoted by the provider as "up to". I almost never come close to these parameters. The best I can expect is about 75% of the "up to" values with 50% being more likely.
